Stryker Webtech LLP. designs, builds, deploys and supports Web Design Service to satisfy a range of customers. We are a company that our customers can trust. We realise the treasure of our clients Thoughts, to preserve and enhance their thoughts is our MOTTO.
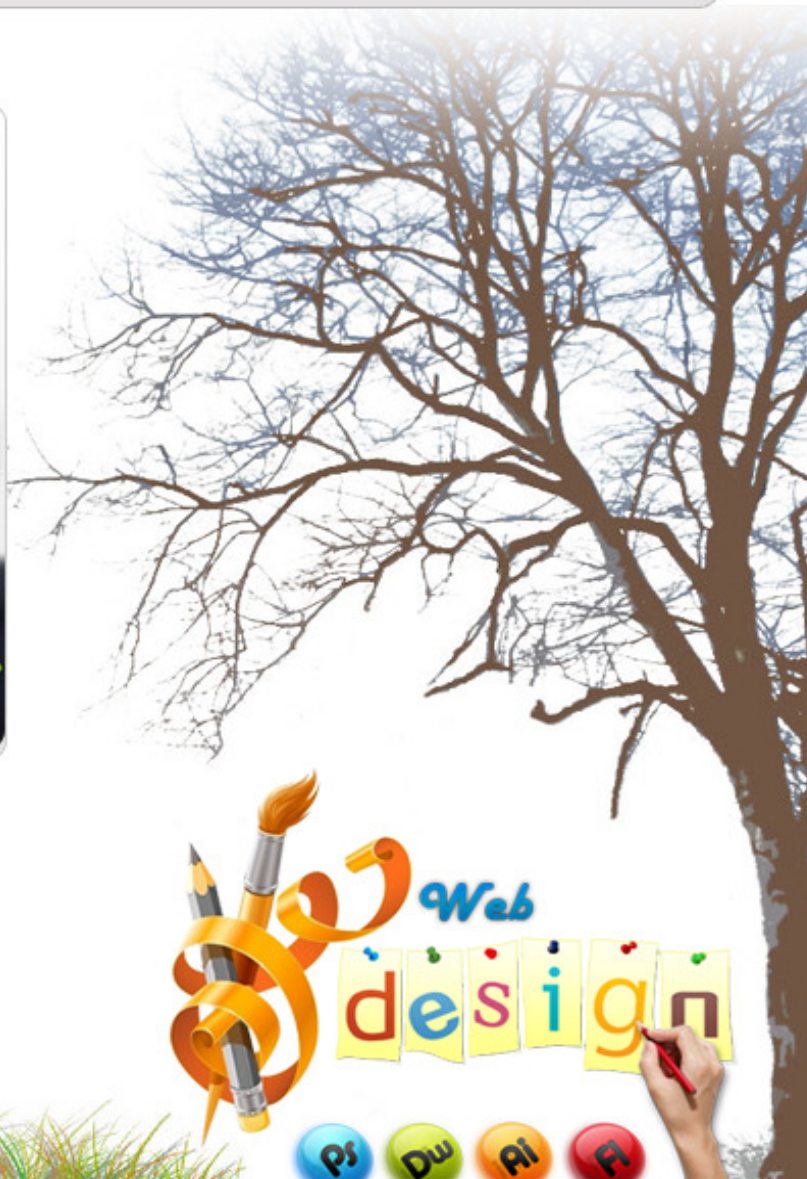

What we design?
Great Websites....Great Values

Our web designers are specialized in making quality web sites that can help you to achieve your company targets over web. Designing web site is only a part of a successful online presence over the internet. We use all the latest and most established technology to create a web site that is visually appealing and yet fully functional. All our works are designed in a manner to give people the most convenient & usable designs that are completely devised according to the web standards using CSS & search engine visibility.

We specialize in
following Services:

- Website Designing / Redesigning
- Logo Designing
- Development Work On Windows Platform
- Internet Marketing
- Web Hosting
- Web Application

Website Development

The approach to the term application development has changed since last some years since the applications has been migrated from traditional Client / Server based application to internet based application. With internet growing so fast and mobility being a key factor in any business. Internet has changed the way the applications are developed in this new era.

With the changing technology and flexible client demand team Concept **Stryker Webtech LLP.** has also mastered its tools and method to adapt new technology and new scripting language which enables us to satisfy our offshore development partners flexible needs.

We have IT skills of international standards and we develop sites compatible with W3C and CSS 2.0 When you engage us to make the web work for you, we first develop a web strategy and then work in consultation with you, step by step to implement your unique web strategy to your fullest satisfaction. We work with you to determine the focus, purpose and style for your site.

Our Web Development Services:

- Website Development
- E-commerce website design and development
- Social Networking Websites
- Travel/News portals
- Website Maintenance
- Classified Websites
- Development work on windows platform

Corporate Websites

Inform customers, generate leads, streamline corporate communication, and syndicate news content.

Online Community and Social Networks

Allow users to create and maintain profiles, interact, generate and manage content and be part of a community.

Mobile Website

If your website is not mobile friendly, you could be missing out not only on traffic and potential customers, but on the future of the internet.

- There are now an estimated 2 billion mobile phones in the world and smart phones are now outselling PC.
- We develop Mobile websites for mobile devices such as iPhone / iPad, Android, Blackberry, Symbian & Windows Phone.
- Get more visitors on the go and drive 13% more audience than PC traffic.
- Having a mobile friendly website will be a necessity rather than a nice-to-have. Get your mobile website now by clicking the button below.

More than 50% of mobile phone owners around the world have browsed the Internet via a mobile handset. Market research agencies are speculating that mobile web browsing might become the next dominant Internet platform. For many consumer-driven companies this means that having a mobile site version is ideal when people are accessing information on the move.

Mobile APPS

We custom design and develop business applications for the iPhone, iPad, iOS, Android, Blackberry. **Stryker Webtech LLP.** focuses our attention on all aspects of mobile development, with your idea in mind. From the beginning phases to the end result, we can help you deliver a final product your customers will love, so let Stryker Webtech LLP. help.
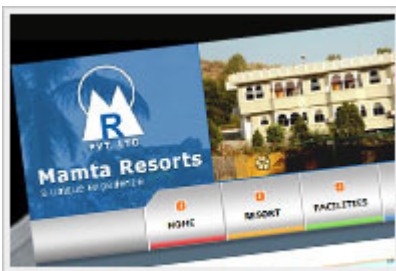

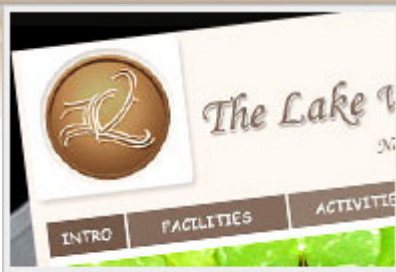

Our Web Portfolio

We have clients who believe that portfolio is as important as their **breath...**

We are known for our speed, quality for work and total commitment. A picture is worth a thousand words. We encourage you to browse our websites to get an idea of our designing prowess. We are sure you will consider giving us a chance to serve your web designing need. To get a complete idea of our portfolio, please check our Website Designing, Web Applications, Website Redesigning.

Our Web Portfolio

Together We…

At **Stryker Webtech LLP.** we believe that in a competitive economy, it is essential that technology-based companies partner each other to allow each company to focus on core strengths while still offering functionality desired by our respective customers. The Business Alliance Partner program at **Stryker Webtech LLP.** is intended to accomplish all of the above with the minimum amount of negotiation over details.

Because our technology has been built on open standards and is functionally rich, we have a number of partners who have used our technology in their solutions to provide the most competitive product possible to a segment of the market. We have other partners who are primarily interested in meeting the demands of a specific customer project and find our technology desirable to compete most effectively for a services-oriented bid.

Levitating into the Future

We have formidable plans for the future. Plans that will draw on the depth of our in house expertise in media design technology.

We will levitate on our competence.
Levitate to raise the bar for our
clients.
Levitate to add value to solutions to delight the customers.

This is an ongoing process at **Stryker Webtech LLP.** and each time we look into the future we look at the creative solutions that could be at better.
